

AIMCAT 1804 Analysis

Section I - VERBAL ABILITY & READING COMPREHENSION

The VARC section of AIMCAT1804 would definitely have soothed the nerves of many of the students as far as the difficulty level of the paper is concerned. With almost equal number of easy/medium and difficult questions, this section should have contributed decently to a good overall score. Having this section as relatively easier one, the number of attempts should also go up and students are expected to jack up their accuracy too at the same time.

About the RCs - there were five passages in all with three passages having 6 questions each and 2 having three questions each. The length of the passages ranged from about 450 to 680 words. The questions were relatively simpler. A well read student would have found RCs to be relatively simpler.

The questions on VA were also relatively easier as compared to the ones from previous AIMCATs. The verbal ability part had questions on Fill in the blanks, Para Jumbles, Odd one out.

Questions like 2, 3, 4, 9, 10, 11, 12, 14, 15, 17, 20, 22, 24, 29, 31, 32, 33 were the ones falling under easy/medium category and the remaining questions as little trickier ones.

Section II - DATA INTERPRETATION & LOGICAL ABILITY

The DILR section would also have provided the test takers an opportunity to score well in this section, and to give a boost to their overall score as well. With the average difficulty level ranging from easy to medium, the students should have taken the advantage to the fullest.

Almost all the questions were either easy or medium in nature. In DI as well as in LR, the questions that were easy to medium picks were 'almost' all of them. All in all, this section was purely based on one's ability to filter out the easier ones first the relatively tougher ones to score over the rest. The questions were based on line graph, bar graph, data arrangement, seating arrangement, etc. Questions like 8 and 11 were the only ones which can be categorized as difficult ones.

85	50

Section III - QUANTITATIVE ABILITY

With QA following the same trail, the test takers must have had a great time in this particular section also. The questions tested the conceptual clarity of the students from varied areas, but most of them were relatively easier.

With almost 22+ questions in the easy-medium category, many of the students would definitely have been able to maximize their sectional as well as overall scores.

In terms of difficulty, question number 6, 7, 8, 9, 11, 15, 17, 23, 24, 25, 26 were the ones which were the difficult ones with the remaining ones as medium and lower toughness level.
